“The change brought about by the shift in our sensory ratios after the introduction of any new media dictates the pattern of involvement in that new environment.”

Luke Tarpey

“Art history and other cultural references form a foundation for my work. I often work in series, exploring a theme or set of ideas. For this exhibition, however, I have chosen to bring together pieces that have evolved from a variety of sources such as science fiction, landscape, the urban/domestic environment and personal associations.”

Paul Lewthwaite

“My work combines private explorations with public discourses that aim to share something of how I view and experience the world around me.”
